SAC will vote on discounts

The placement of a student representative on the Academic Senate and a joint discount card venture with Cuesta College will be the main items of business when the Student Affairs Council meets tonight at 7:15 p.m. in Rm. 220 of the University Union.

According to SAC chairman Mike Hurtado, the council will vote on whether to endorse the placement of a student representative on the Academic Senate.

He said there had been a student rep for this group until 1971, when the senate decided student representation was not needed.

The Academic Senate is made up of faculty representatives from the various schools here. They rule on items such as tenure, reappointment and promotions for faculty members here.

The discount card business item deals with the renewal of a joint program that was started a year ago but canceled after Cal Poly decided the program was unfair because Cuesta students were getting the card for free and getting it before Poly students.

Cal Poly students were paying \$1 for the card which is used for discounts at several San Luis Obispo merchants.

According to Hurtado, a compromise has been worked out with Jay Martinez, Cuesta student body president. Martinez said Cuesta students will still get the card free but not until after they have registered. This will prevent them from getting a "jump" on Cal Poly discount seekers.

Job lists, placement available

by ARMANDO CORELLA

With unemployment reaching about 8 per cent nationally, jobs are tougher to find than they used to be. The placement center here, however, offers invaluable services to students entering the job market: services that can spark a flame of hope in the dimmest of economic outlooks.

If students are aware of the placement center, they must not know much more about it than that it is located on the first floor of the Administration Building.

Director Gene Rittenhouse emphasizes that the prime time for seniors to approach the center is in October.

"The sooner we get them in here, the sooner we can get underway with resumes and data sheets...and preparing them for interviews with recruiters," said Rittenhouse. "But here it is April already and we still have students who are just now coming in to us for help; after having missed six months of recruiters."

As Associate Director Richard Equinoia put it, "We don't place anyone. We try to equip the student with the necessary tools to place himself." One of the tools Equinoia speaks of is the process of applying for a job.

ROTC students clean rifle parts in the armory on campus. Classes are offered through the military science department and are part of the officer training program here.

Drill begins in classroom

by DENISE COLSTON

There is more to the Reserve Officer Training Corps (ROTC) than ammunition and guns. In fact, little work is done with weapons. A student begins his education in a classroom through lectures, continues it with demonstrations and completes it by practical application.

Live ammunition and M-14 rifles are used once a year during class training. Blanks are used during field training and on weekend maneuvers. In field training men are divided into teams and changing locations is practiced—hopefully without the opposing teams' detection. Navigation using maps and compasses is practiced.

Ammunition is received from Fort Ord, Calif. when needed. It arrives at Cal Poly on Friday and is completely expended the next day. During the night's stay, the ammunition is under constant surveillance and is patrolled by campus police, said Captain Richard Terry, assistant professor.

"I cannot go into any more detail. It would be like telling your opponent the play you are running next," says Terry.

ROTC instruction is for students who desire to fulfill their military obligation as commissioned officers. To be eligible, a student must be regularly enrolled at Cal Poly, have time to complete advanced ROTC courses before reaching age 28 and have a statement from his physician stating he is physically qualified. All necessary ROTC

equipment, uniforms and text books are furnished to the student by the United States government.

A fatigue uniform and a class 'A' business uniform are issued to ROTC students. The fatigue uniform consists of a hat, shirt, pants and boots. The class 'A' uniform is comprised of a hat, shirt, tie, pants and shoes.

After graduation a student may enter Active Duty for Training—a basic officer course in his occupational field for three months. He is then a member of a reserve unit for six years or can take a full two year tour overseas.

A ROTC scholarship student serves four years of active duty in the branch of the Army where he desires to be commissioned. He may request the general geographical area in which he desires to be stationed.

During the four year ROTC program, students attend Advanced Camp at Fort Luis, Washington. All expenses are paid by the government. Additionally each student is paid one half of a Second Lieutenant's pay.

The student's leadership principles are examined at camp. Every student acts as a commander in different positions—company commander or platoon leader. The student is then evaluated by the major.

A flight instruction program is offered to students in advanced ROTC classes. The program is an extracurricular activity, without cost to the student. Each student receives 35 hours of ground instruction and 36 and one-half hours of flight instruction. After a cadet finishes this course he is eligible to apply for his private pilot's license.

Any student at Cal Poly may enroll in Military Science classes for elective credit.

System adds route

A third route has been added to the San Luis Obispo bus system. Beginning April 1, San Luis Transportation Inc. has made all of San Luis Obispo within 50 minutes of Cal Poly.

Route three begins near City Hall on Osos and Palm streets, travels in the opposite direction of a section of route two (Broad St. to Orcutt St. to Johnson Ave.), through the center of town, out to Higuera and back through town to city hall.

Students can take advantage of route three by taking routes one or two from campus and changing buses at City Hall.

Students are reminded that bus tokens are available at the University Union Information Desk for only 20 cents (5 cents less than regular fare). The fare is only 10 cents on Sundays and Thursday nights.

For more information check at the Information Desk in the University Union or call San Luis Transportation at 545-4510.

News briefs

WASHINGTON (UPI)—President Ford said Tuesday America will emerge from its Indochinese ordeal stronger and wiser.

"We should not fall into the trap of blind nostalgia—of persuading ourselves that America's best years are behind us. There is a lot of negative talk like that going around," Ford told some 3,600 delegates to the 84th Continental Congress of the Daughters of the American Revolution.

"I think it can be answered in one word: nonsense."

"Our experience in Indochina has been one of heroic sacrifices and great disappointments—I am convinced that we can and will emerge from this ordeal stronger and wiser as a nation..."

The delegates cheered Ford eight times. Loudest applause in Constitution Hall came when Ford said the price of security is keeping America militarily strong: "National interests can be guarded only by national strength."

Ford said only by military might can America possess the strength to engage in detente with Russia and East-West talks on limiting nuclear arms.

PARIS (UPI)—Exiled Prince Norodom Sihanouk's role in a Communist-run Cambodia likely

will be that of a figurehead and any new government will be directed by little-known rebel leader Khieu Samphan, a spokesman for Sihanouk said Tuesday.

The statement was telephoned from Peking and broadcast here by Radio France, as the fall of the Cambodian capital of Phnom Penh to the rebel Khmer Rouge Cambodian Red appeared imminent.

Sihanouk was deposed as Cambodia's chief of state in a bloodless coup March 18, 1970, and went into exile in Peking. He said that if he returned, it likely would be as a figurehead—a sort of "public relations officer for international affairs," as he defined it.

The telephone announcement indicated an agreement on governing Cambodia had been reached between Sihanouk and the Khmer Rouge insurgents, whose leaders include some of the pudgy prince's one-time enemies.

BEIRUT (UPI)—Palestinian guerrillas and right-wing Phalangist commandos battled in Beirut Tuesday with mortars and machine guns for the third day. Government efforts were fruitless.

Parts of Lebanon's capital city were virtual war zones, deserted of all but armed men shooting at one another. There were bomb attacks, too.

HARRISBURG, Pa. (UPI)—A federal grand jury investigation into the possible harboring of Patricia Hearst in a Pennsylvania farmhouse was postponed indefinitely Tuesday. The subpoena against the only known witness was blocked. The witness, Jay Weiner, 20, of Philadelphia, had testified earlier and had been subpoenaed for a second appearance Wednesday.

The subpoena was put into abeyance, after his attorney filed a motion that it be suppressed entirely, charging the government had used improper means in its investigation.

WASHINGTON (UPI)—Both the prosecution and the defense rested their cases Tuesday in the trial of former Treasury Secretary John B. Connally on charges he accepted a \$10,000 bribe from a milk producers cooperative.

The attorneys ended their cases after Connally, the last of 11 defense witnesses, completed two days of testimony in which he emphatically denied charges he accepted a bribe in 1971 for his help in convincing President Richard M. Nixon to increase federal price supports for raw milk.

The jury of five men and seven women presumably will begin deliberations in the case late Wednesday.

Editorial

Mud 'n honey flow

Even though ASI candidates for the upcoming election are not officially allowed to begin campaigning until the Monday after Poly Royal (April 28), honey and mud are already flowing through my office, side by side.

The mud flows in the door and right back out; the honey just comes in and sticks, rather disgustingly, to everything.

You see, it's been a yearly tradition for the editor to endorse a presidential candidate immediately preceding the election. And this year's hopefuls have no trouble remembering that the candidate Mustang endorses is usually the next ASI president.

So honey has flowed in my direction in the form of special favors and all sorts of conciliatory actions toward Mustang Daily. Eventually too much honey, like too much peanut butter, sticks to the roof of your mouth and gags you, unless it's accompanied by something more substantial to wash it down with.

And while the honey sticks and stays, the mud seems to be picking up speed.

I suppose lashing out against other candidates should be expected in the truest political tradition, but it does not fail to turn me off, nevertheless.

The number of "horrible" rumors that wait through the Graphic Arts building becomes more and more momentous as election time draws near. I'd like to see how many of those rumors come from one or another of the campaigning parties.

Any candidate who operates his campaign from the general area of the pig pen deserves whatever may get splashed on him during the mud-slinging.

The surest way for him to lose votes, and probably the election, is to undermine his opposition as much as possible, base his campaign on the faults of the other contenders, and keep pushing to find out whether or not he has my editorial endorsement.

The surest way for a candidate to win is to worry about his own position and his own campaign, not to waste time trying to find out how the opposition does nor how Mustang feels.

In the past, this campus has been subjected to a series of infamous campaigns, many of which reached professional political heights—and depths.

I hope that the candidates remember that they are students who want to work for students, and that expensive, elaborate campaigns have no place on a university campus.

Student turnout in previous elections has been pitifully small, and the candidates who had the strongest private-interest groups (i.e. fraternities, student government, minorities, campus organizations) took the election.

Whether you care or not, the ASI presidency is an important position on this campus, and could be even more so if it represented a balanced segment of the student population.

I will try to acquaint you with each presidential candidate as thoroughly and objectively as I can, publishing verbatim question-and-answer interviews with each of them.

I will only make an endorsement if and when I feel I know each candidate's qualifications and goals as thoroughly as I possibly can.

I will NOT endorse on the basis of the "who's-nicest-to-Mustang" syndrome.

But at least I think I can stop worrying about a fire-bombing for a while....

Enrollment plateau effects discussed

Possible effects of the three-year enrollment plateau upon Cal Poly and the community were outlined Monday in a series of staff reports discussed at the President's Council.

Enrollment at Cal Poly will be held to 13,800 annual full-time equivalent (FTE) students for the following three years starting from the academic year of 1975, according to an announcement last month from Pres. Robert E. Kennedy.

Comparing pre-plateau enrollment targets with the 13,800 level, the staff reports dealt with expected effects upon admissions, housing, facilities planning, hiring and economic impact on the community.

Dean of Students Everett M. Chandler said procedures are under consideration to assure fair admissions. He is basing this on Cal Poly's experience of 1971 when enrollment was held at 12,000 FTE.

Other reports included those concerning predicted losses in funds which otherwise would have been spent on the community and the levelling off of personnel on the Cal Poly staff.

"It is truly unfortunate that these effects will be felt at a time when we have literally thousands of students more than we can accommodate, who would like to enter Cal Poly at a time when jobs are becoming increasingly scarce," Kennedy said.

Engineering dept. subject of evaluation

The colonial roots of America as personified in the personality and career of Benjamin Franklin will be presented as a lecture by Dr. Tim Barnes tonight at 6:30 in Rm. 125 of the Agricultural Engineering Building.

The lecture is a part of "Revolutionary America," a class offered this quarter in observance of the Bicentennial. The public is invited to attend.

There will be an open discussion entitled "What is a Catholic?" following the 7 p.m. business meeting of the Newman Club tonight in the Agricultural Education Building, Rm. 221.

Refreshments will be served. For more information call June at 541-0448.

The San Luis Obispo County Band will present its spring concert on April 26 at 8 p.m. in the Cuesta College Auditorium.

The band, under the direction of Coleman Binyon, consists of members from San Luis Obispo County, Santa Maria and Guadalupe.

Binyon, a retired Army Band Master, is an instructor on Cuesta College's adult staff and band members are former professional, semi-professional and amateur musicians.

Financially supported by San Luis Obispo County and sponsored by Cuesta College, the band meets Thursdays at 7:15 p.m. in the music room of the Laguna Junior High School on Los Osos Valley Road.

A slide show dealing with the proposed Estero Bay supertanker port will be presented by a Standard Oil of California representative during a meeting of the Cal Poly University Club on Thursday, April 17, at 11 p.m. in the faculty dining room.

Steve Knox, who will present the slide program, will answer questions about the controversial project following his presentation.

The president of Morro Bay Tomorrow, Willard McGonagill, will discuss the proposed Estero Bay supertanker port at an 11 a.m. meeting of the Public Interest Group on Thursday, April 17, in Dexter Library, Rm. 128.

Interested persons are invited to attend the meeting.

Determining what a bachelor's degree in electronics and electronic engineering means in actual knowledge is the goal of a study students from that department will be participating in, explained electronic engineering professor Warren Anderson.

The study, conducted jointly by the Western College Association and Educational Testing Service, is being conducted at 90 colleges in California and other western states in nine academic fields. Anderson said electronic and electrical engineering was the only department at Cal Poly to be designated for the evaluation.

He added the study, financed by a grant from the United States Department of Health, Education and Welfare, will include examining catalog descriptions of courses; course outlines; statements from professors ex-

plaining course objectives; possible interviewing of students and a two hour standardized engineering exam to be administered to participating students.

Anderson said the study will also look at how electronic and electrical engineering departments compare at different campuses.

"We should get a feel for how we stack up against our peers at other campuses," he added. "The study will see what kind of knowledge in the discipline we're trying to teach our students here."

Anderson said instructors from different campuses will discuss through telephone conversations their own goals in getting across knowledge in specific classes.

He said the department will receive a final report on the study and that it will be up to it to decide what use to make of the results.

The student chapter of the American Society of Mechanical Engineers will feature a lecture about reactor safety precautions and fuel rod burnout in boiling water reactors at the Thursday, April 17, meeting.

The lecture by Jim Easter, a Westinghouse representative, will follow the group's 7:30 p.m. business meeting in Engineering West, Rm. 236.

All interested persons are invited to attend the meeting and lecture.

For further information, contact Bert Taylor at 545-2263.

The Avila Formula: Life Among Friends

Photos by Gil Rocha

Cathy Rodgers is one of 35 students at the Avila School for handicapped adults. For Cathy, each day is filled with laughter, friends and new discoveries. The future indeed looks promising. Cathy begins her exercises each day at 11 a.m. (ABOVE) followed by a quick refreshment period at the snack bar (RIGHT). In between instruction periods Cathy enjoys a friendly chitchat with her good friend Margaret Beebe (BELOW).

Job lists, placement available

The first step is to formulate a "self evaluation". The placement center helps the student to assess himself; then to get it down on paper. This is called a resume. The resume is used by recruiters and prospective employers to better understand what the student has to offer.

A letter with the objective of getting an interview must then be written, and again the placement center assists the student. Often times a recruiter will be visiting the college in the near future which would supersede an "interview letter".

The next step then would be to prepare the student for the interview. What kind of questions to expect; what kind of answers to give... The key factor however, is appearance.

A recruiter invariably looks for his company's image in the student and asks, "Could this person work for us?" If the student does not portray the desired image, his best hope is to impress the recruiter with an outstanding feature or ability. For this reason, the placement center suggest a conservative approach when it comes to appearance.

"Appearance is a tremendous factor," said Equinox, "we inform the student of its importance but the decision is his."

Upon completion of an interview, a letter of appreciation is written by the student with assistance from the placement center if necessary. The end of this process involves decision making about job offers. The center also assists students in selecting the best job offer.

Students probably are most familiar with part time employment help from the center. Part time jobs are usually called in by employers but occasionally full time openings arise. Jobs are filled on a first come first serve basis. However, a registration card should be filled out and filed at the center which may be used to contact a student about a job.

Getting food together

Peyote, ice cream and muscle activity

Editor's Note: This is the second in a series of articles dealing with nutrition, written by Stuart Watts and Suzanne Chalk, dietetics students at Cal Poly.

There is a tube that runs completely through our body that never really enters the body tissue. The digestive track from mouth to anus is a continuous space that doesn't enter our body.

It's the exchange canal where outside environmental factors can enter into our body through the process of digestion. If you were to eat a head of lettuce only 1 per cent of that head would enter into your body, the other 99 per cent would pass through.

Various secretions in the body will change the color and mechanical processes will change its shape, but it's essentially the same head of lettuce. Lettuce has its dietary use, but cellulose is hard for the body to digest.

Different foods yield different results to the body. The chemical combinations of the food affects you in different ways. An example is to eat some peyote buttons (a plant) or eat some oranges. Each have their own effects just as cookies, ice cream, or soda pop does.

Certain foods are good for you and help you develop in many ways. When I talked about respecting the temple of your body (in last week's article), I meant you should ingest foods that would be beneficial to the body and not ones that could be harmful.

Many people don't really understand what is good or what is bad so we'll run through some information on some items that are needed, carbohydrates, fats, and proteins and we'll see what the body needs of these.

Carbohydrates are starches and sugars. Almost every fruit contains sugar, vegetables contain starch or sugar, and grains contain much starch. There are many foodstuffs which contain high amounts of carbohydrates. Starches and sugars breakdown through digestion into smaller sugars called dextrose and are used as energy in every activity of the cell.

Every muscular action, every glandular function, every function of the nervous system depends upon the metabolism of dextrose. An important factor to consider with carbohydrates is taking the correct amount to avoid any deficiency or excessive supply which may lead to numerous forms of disease.

Yet, the body does need some carbohydrate for all the functioning of the body. The best sources are not in the intake of sugars like table sugar, honey, or syrups, (although this can lead to additional calories for an undernourished person) but in fruits, vegetable, and grains which are easier for the body to digest and contain many vitamins and minerals.

A rule on the amount of starch to be eaten is the following: When you feel heavy, sleepy or fatigued after a meal containing starch, you should reduce the amount of starch in future feedings. This rule will be workable only with people who do not take stimulating beverages, such as coffee and tea with their meals. These drugs, like any other drug, mask the real sense of the body's condition. When energy is quickly needed by the body, a glass of fruit juice yields lots of energy.

THE STRONG AND THE MIGHTY—Ringmaster John Strong, and Neena, his elephant performer, will be on hand Saturday with the John Strong 1889 Circus.

Circus treat in town Saturday for SLO

The circus is coming to town! The John Strong 1889 Circus will be in San Luis Obispo April 19, with performances at 1,3 and 5 p.m. Early arrivals at the Madonna Plaza parking lot may watch one of the last billowing big tops being erected.

The Wendany Troupe of Acrobats Supreme, from Hanover, Germany, is the star of the show. Internationally acclaimed as undisputed masters of the mini-trampoline, the Wendany Family has in recent years starred in every major American circus.

Bishop Duo, sharing the spotlight with the Wendany Family, will present a unique comedy tightwire routine that is

guaranteed to cause hysterical laughter.

Neena, a petite pachyderm, will be present. Neena will be accompanied by trained dogs and horses under the direction of Miss Sharon, of "Born Free" fame. As a special surprise, Cindy, the chimpanzee from Hollywood, will be visiting the circus.

What is a circus without clowns? This year's Clown Alley is headed by Phil Shear as "Philippe," formerly with the "Greatest Show on Earth." Perhaps best epitomizing the circus, the clowns will again try to steal the hearts of their audience, and with them, the show.

Newman club

Movie on farm worker's plight screens tonight

Si Se Puede (It Can Be Done), a motion picture on the plight of farm workers, will be shown today at 7 p.m. in Chumash Auditorium.

The film is about the United Farm Workers' (UFW) struggle to create a viable union in Arizona, one of the few states that still has a "right to work" law on the books.

The film is highlighted by the 24-day long fast of Cesar Chavez which created much support from many politicians including U.S. Senators Robert F. Kennedy and George McGovern.

A panel of students including Manuel Echavarria, former director of the UFW in the Central Coast region, will be present to speak and answer questions on issues concerning the union and its boycott tactics.

In addition, Maria Martinez will read some of her poetry about the farm worker and his struggles in the fields.

The event at Cal Poly is being sponsored by MECHA, a Chicano students organization. Admission will be free.

'Godspell' features St. Matthew's gospel

by FRANK NOLAN

"Godspell," the modern musical adaptation of the Gospel according to St. Matthew, that was a 1971-1974 stage hit in New York, will be presented at the Cuesta College Interact Theatre April 25 through May 11.

Acclaimed by clergy, critics, educators and audiences in the U.S. and other countries for its

joyful message, loving spirit, youthful exuberance and simple sincerity, this rock musical ran as long in London as in New York and was presented in 17 other cities during the first year of its epoch-making New York run.

On a stage that is almost bare, a cast of ten zany young people will dust off the tricks of the clown's trade (pantomime, slapstick, song and dance) to act out such parables as the "Prodigal Son" and the women taken in adultery.

None of this has been found irreverent. Some of the highest praise offered "Godspell" has come from distinguished clergymen. The Reverend Richard R. Kirk, of the Cathedral of St. John the Divine in New York, declared that the production "seemed to recapture the joy of the good news which gave it such an impact in those early days of the faith... The Gospel did not lose from its cutting edge through being enjoyable and fun. Given God's sense of humor and his wisdom, "Godspell" is just the way He would have the story told, a lesson some of those who preach today could well learn anew."

The cast includes Vanessa Arndt, Liz Miller, Beth Betten-court, Darlene Schell, Karen Shelby, Lori Day, Sally Skafte, Kris Kraker, Sandy Perry, Kim Mierniki, Theresa Shipsey, Pat Sibly, Richard Denison, Gary Gregg, J. Cobb Colley, Jim Morton, Les Fox, Warren Cox, Gary Duhl, Bud Izen and Ed Mullen.

Jack McBade, as director, will be guiding the cast through its clowning paces.

Tickets for "Godspell" will be priced at \$2.50 for adults, \$2.00 for students, and \$1.00 for children.

Reservations and ticket information is available at Cuesta College, phone 544-2943, extension 11.

Record Review

'Common Sense' vehicle for Prine's finest writing

by BLAIR HELSING

John Prine's "Common Sense" (Atlantic) Aside from being a vehicle for some of Prine's finest writing, this album summons forth more mixed feelings than any folkie-cum-rocker effort in a long, long time. Seeing the names of the Aylum All-Stars (Browne, Souther, Frey) prepares one for a West Coast sound, watered down with the L.A. clean machine production values and sensibility of recent years. Instead the steady hand of Steve Cropper keeps the roots planted firmly in Southern soil.

Giving Prine rock and roll backing initially seems a mistake, but time fleshes out the facts: Prine can handle the additional responsibility of more electricity (although in a less provocative manner than the Dylan of ten years ago), and does so, admirably. The only, repeat, only thing that stands between this album and your enjoyment of it is your purchase and three or four spins on the old Garrard.

Bad Company "Straight Shooter" (Swan Song)-Success.

the past work of its members, and this L.P. make Bad Company a difficult band to assess. It seems a relatively safe bet, however, that nothing with the lasting charisma of Free's material (even at its most mediocre) will be coming out of this grouping. Neither venture into the studio has given these four country bumpkins anything that stands holding up to a strong light.

Ironically, Free's music had lots of space, but sounded full, whereas the attempted fullness of the B.C. sound vainly tries to cover the holes only to make them more apparent.

Buy it if you will, but in the knowledge that you're missing the best of his band by overlooking its background.

Nilsson "Dull on Mon Dei" (RCA)- The rewards to be gotten from the humor here are roughly comparable to the rib-tickling on the early Randy Newman product, to a power of ten. Nilsson has never been especially subtle in his cockeyed view of the world, and with the help of Van Dyke Parks, he is more blatantly

rollicking on "Dull" than ever before.

Lyrical, he shows much of the same commercialism (in the strictest sense) and TV-nurtured sarcasm that Newman once specialized in, and it's all carried out in the finest tongue-firmly-planted-in-cheek manner. Justice willing, this shan't be a sleeper.

Lynyrd Skynyrd "Nuthin' Fancy" (MCA)- And nothing very adventurous. When you get to the essence of their music, Lynyrd Skynyrd is a band of rednecks with long hair, which is really what appeals to alot of their supporters.

Well, this stuff is all A-OK, but they might as well have titled it "Lynyrd Skynyrd, Vol. III," for all the new ground it breaks. The boys try to hide their working class roots by flatly advocating gun control ("Saturday Night Special"), but in the very next song proceed to destroy their own facade by verbalizing the sentiment that the only way to treat a cheatin' woman is to shoot her in the head. The real fun in Lynyrd albums is seeing how schizo they can get, wouldn't you say?

Movie Review

Coppola's 'Conversation' seems incomplete at end

by LIZ CURRIE

A good acting job by Gene Hackman is the major high point of "The Conversation," a film written, produced and directed by Academy Award winner Francis Ford Coppola (The Godfather I and II).

The movie, now showing at the Obispo Theater, starts out at a slow, confusing rate but picks up speed and has some very suspenseful moments. It ends on a note that leaves the audience wanting more, mainly because the film seems unfinished.

"The Conversation" is just that—conversation. But what a conversation it is.

Hackman plays Harry, Caul, a surveillance expert hired by "the director" to tape a young couple's conversation as they stroll through Union Square in San Francisco. The film begins with scenes of the taping which are also shown as flashbacks throughout the movie.

Caul, famous for his surveillance feats, begins to doubt the ethics of the job he has dedicated his life to. A few years previously, tapes he had made for the Attorney General were so damaging that some innocent people were killed. He never got over his guilt, although he continues to justify his actions by saying that all he does is perform a job—once he turns over the tapes, it's out of his hands.

But, in one of the best scenes of the movie, Caul goes to confession and tells the priest he has

realized what he is doing is dangerous to some people. He is scared the couple he is taping will be in danger if he hands the tapes over to the director and he tells his doubts to the priest.

The couple Caul is taping seem like a likeable young couple, but don't be deceived. They have a secret that is not revealed until the end of the movie in action that is as shocking as is revealing. Caul turns out to be justified in his fears of taping conversations, but not for the reasons he feared.

The conclusion of the film is many things—sad, scary and ironic. I felt disappointed by it and by this film. Although it does have some good scenes, I don't think it's worth it to sit through the dull scenes that precede. And even Hackman's performance can't save the film.

What's the first thing that comes to mind when someone says, "Cal Poly sports?"

Is it the tradition of Mustang football, memories of countless wrestling champions, or maybe it's the bruising success of the rodeo team that strikes a nerve.

Whatever comes to mind, one sport you may have overlooked is volleyball. Interest in the sport is not only thriving on campus, but growing. It's slowly developing a winning tradition all its own.

In four years volleyball has evolved into one of the most successful athletic programs on campus. And as a spectator sport, volleyball has attracted an ardent following that someday may rival the popularity and domination of football on campus.

Ken Preston, coach of the Mustang volleyball team has been instrumental in the development of a winning squad as well as promotion of the sport throughout San Luis Obispo County.

Preston, who came to Poly following graduation from the University of California at Santa Barbara in 1970, has been the architect of a number of programs to promote the sport throughout the community.

Although Preston's responsibilities as coach consume most of his time, he is hopeful the conclusion of the present season will allow him more time to pursue the direction of volleyball programs on the primary and secondary school levels.

Preston feels that the future of the sport relies on the creation and development of organized leagues to teach the fundamentals of it.

Preston cited the Santa Barbara City and Recreation Department, as directly responsible for the overwhelming public interest in the sport in that city.

"Extensive programs started at the grade school levels and continued through the high schools, have led to greater understanding by the public of the basic fundamentals and aspects of the game."

Fundamentals ideally should be taught and learned at an early age. Preston feels San Luis Obispo County needs a program to teach the basic skills and familiarize youngsters with the sport.

"Without proper instruction in the fundamentals youngsters will never develop into proficient players needed to compete in college matches and ultimately represent the U.S. in world class competition," Preston said.

Preston held a high school clinic last year and it was greeted with such positive response from the participants that he has planned several more for later this spring throughout San Luis Obispo.

"I take several of my players to the clinics and demonstrate the proper execution of such skills as the bump, set and dig. We also give them (students) background to the sport such as rules, court dimensions, and strategy involved in playing the game," said Preston.

Preston emphasized the need for perfecting these skills by citing his own team as an example.

"We started playing volleyball the first week of school with drills concentrating on the fundamentals, long before we ever began to think about style."

But once fundamentals have been mastered, style becomes very important.

Elbow, hand and body position are critical to a volleyball player executing a move. To properly execute, a player must develop three skills. The quickness of a basketball player, the strength of a swimmer and agility of a football player.

Unlike some sports where one skill often times makes a good competition, a volleyball player

Volleyball at home in San Luis Obispo

must have all three qualities in order to excel. The coordination of these skills into a controlled style of play is the difference between volleyball players and participants in other sports.

For example, a football player can rely on strength alone to beat his opponent, but a volleyballer must combine strength with speed in order to be in the right position to return a spike moving at 75 m.p.h.

Preston's strong emphasis of drills to master the necessary skills has paid off this year.

In their second year of inter-

collegiate competition, the Mustangs are atop the tough California Collegiate Volleyball Association conference and should finish with a 15-1 league mark. They also own one of the best overall records for a small college on the West Coast with a 27-3-3 mark.

This is in contrast to last year, when the team experienced many of the red tape problems that accompany a growing program. The team didn't begin to practice together until just before the season opener and never meshed

into the finely tuned unit hoped for.

But this year has been different.

With the return of six players and the assurance of the head coaching job, Preston organized the team and started regular practice sessions the first week of school.

Long hours of practice have helped the team mature and develop a strong understanding for each other's strengths and weaknesses as well as their style of play. This, Preston feels, is the key to the success of the team this year, it's team work. The winning ways have been a result of sacrifice on the part of Preston and players. They have been practicing and competing for over seven months, including one week over the Christmas holidays.

"Dedication" and "perfection" has been the theme of this year's squad and the long hours of input are finally bearing fruit.

The Mustangs have qualified for the California Collegiate Volleyball Tournament at UC Davis and the Far Western Volleyball Championships at Berkeley this weekend.

Looking ahead to next year, Preston loses five players to graduation and foresees a year of rebuilding.

Four of the five playing in their final season are starters. Team captain Jeff Blanchard, setter Rich Giacomuzzi, three year veteran Chip Wessburg, Tom Worth and Max Boveri defensive specialists used primarily as sub-

Wednesday, April 14, 1971

Page 7

stitutes will also graduate in June.

Setter Steve Bartlett and freshman Rick Hauser are being counted on by Preston to form the nucleus of next year's team.

Preston said, "There are a number of excellent prospects with the necessary ability and potential to be excellent volleyball players."

Next year will mark the fourth year of funded volleyball at Cal Poly and Preston's third at the helm of the team.

Preston described his biggest continuing problem as an inadequate budget. He has performed a continual juggling act to meet the rising expenses with the smallest budget allowance in the athletic department.

But the mustachioed Preston is optimistic the increased interest and support of the gamewill eventually bring about an increase in the budget allotment.

Preston, who is currently working on a masters degree in physical education, sees the popularity of volleyball on this campus as part of the growing interest in the game throughout the country.

Preston related the increased interest in volleyball with the high caliber of competition found in the Olympics.

"The 1972 Olympics stirred a lot of interest in the sport. And with the increase in public knowledge about the game, the 1976 games in Montreal should provide some of the most exciting volleyball, from a spectator's point of view, ever."

But for the always smiling Preston, who seems to eat, sleep, and think nothing but volleyball, the Olympics are a long way from those long hot summer afternoons of good old beach volleyball at Avila Beach.

Fresno is PolyRoyal rodeo foe

Rodeo teams from Cal Poly and Cal State Fresno, will continue their nip and tuck battle for dominance of the Western Region of the National Intercollegiate Rodeo Association during the Poly Royal Rodeo on Friday and Saturday, April 25-26.

More than 150 collegiate rodeo performers will compete in the two-day show, which is scheduled as part of the 43rd annual Poly Royal celebration at Cal Poly.

Poly Royal is an open house of 52 instructional departments surrounded by a host of special attractions, including band concerts, an aquacade, Poly 500 soap box race, baseball games, a concert by Will Rogers, Jr., and a barbecue luncheon.

Lee Rosser of Marysville, an animal science senior and rodeo chairman, says 22 teams from community colleges, four-year colleges and universities in California, Nevada, and Arizona will be represented in the arena during the Poly Royal Rodeo.

Men will be competing in Brahma bull riding, saddle and bareback bronc riding, calf roping, team roping, and steer wrestling. Women's events include break-away roping, barrel racing, and goat tying.

The Poly Royal Rodeo is one of 14 in the NIRA Western Region in which contestants are earning points toward regional championships and eligibility for the national competition in Bozeman, Mont., in late June.

Tickets for the campus event will go on sale at the information desk in the University Union at Cal Poly on Monday, April 14.

Prices are: reserved seats \$3 when purchased prior to 12 noon on April 24, and \$3.50 at the gate; general admission, \$2 for children under 12, \$2.50 for university students, \$2.75 for all others.

Coed nine wins league opener

Cal Poly launched its women's intercollegiate softball program Saturday with a good start by beating UC Santa Barbara, 16-6.

The two schools were originally scheduled to play a doubleheader. However, after the beating UCSB suffered from Poly in the first game the Gauchos threw in the towel and conceded the second.

Jo Gilbert, a sophomore shortstop from Escondido explained the reason for the easy win was UCSB didn't have a good pitcher. Gilbert added she was too slow.

Couch Mary Stallard was quite pleased with results from the team's first game. Kim Graham, a junior majoring in Physical Education, pitched the full 7 innings.

Valerie Filice hit two triples. The junior from Gilroy hit her first one in the first inning driving one run in. She hit her second in the third, driving in two more runs.

The team will travel to UC Riverside on April 17 to participate in a tournament with 10 other schools.

Track coach honored 'The Meet'

track team statistics

The trackmen competed in "The Meet" Saturday at Pauley Track in Santa Barbara.

UC Santa Barbara hosted the meet for the second straight year and hopes the meet will grow into a major relay meet sometime in the future.

Couch Simmons and his Mustang trackmen regarded the meet as "a check point along the season to weed out the final few problems of the men" in preparation for the CCAA conference meet and the NCAA national in May.

Mustangs results:

440 relay 2, CP, Fraisure Sumpter, Russ Grimes, Kerry Gold, and Walter Mead, 41.9.
1500 meter 2, Dave Marlow, CP, 3:57.9; 5, Brian Tracy, CP, 4:03.4.
110 meter HH 3, Walter Mead, CP, 15.2.
100 meter 3, Grimes CP, 11.0.
800 meter 3, Mike Lamb CP, 1:57.0.
440 meter 3, Mead, CP, 54.5.
200 meter 2, Gold, CP, 22.0.
Shot Put 3, Steve Buss CP, 44.5 ft.
Mile relay 1, Gilbert Proctor, Curtis Byrd, Kevin McNamara, and Gold, CP, 3:15.0.

Mustang track coach Steve Simmons has been selected to serve as a Long Jump and Triple Jump coach for prospective 1976 U.S. Olympic team members.

The specialized camp is to be held at the University of Washington at Seattle from June 12 to 18.

The top 10 men in the country, based on their marks in both the long and triple jumps will be invited to the camp.

Simmons will be working with the triple jumpers along with Charles Craig, head track coach at Cal State Bakersfield and former AAU champion, and Dean Hays of Middle Tennessee State.

The long jump coaching will be headed by ex-Olympian and present administrator at the University of Tennessee, Ralph Boston, along with Hays and Gayle Hopkins, coach at San Francisco State and a 1964 Olympic team member.

The camp coordinator will be Oregon State track coach Bernie Wagner. Wagner will coach the

U.S. Olympic jumpers in 1976.

"This is the best preparation we have ever had before the Olympics," said Simmons. The object of the early June camps is to give the athletes coaching before the summer overseas tours so they will have a solid coaching base to prepare for the 1976 Olympics. We will hold seminars and work with film analysis as well as on the field coaching."

At 32, Simmons last summer served as a coach on a U.S. State

Department and U.S. Track and Field Federation sponsored tour. He concentrated on field events for the extent of the seven week tour which included stops in Kenya, Nigeria, and the Ivory Coast.

In 1971 Simmons was the triple jump coach at the U.S. Olympic specialized training camp at Bowdoin College, Brunswick, Maine. In 1970 he assisted at the Huidore Athletic Club in Denmark for five weeks during a summer tour.

Netters win opening round of CCAA play

There was some speculation by Coach Ed Jorgensen as to how his tennis team would fare this year in conference play after losing such a tennis star as Dan Lambert.

Jorgensen would seem now to have little doubt about his Mustangs after they swept all four tennis matches this past weekend in the opening round of conference play.

Cal Poly opened up conference play on Thursday by defeating Bakersfield, 9-0.

The Mustangs came back on Friday winning two matches from Los Angeles State and UC Riverside. On Saturday the netmen completed the conference sweep by defeating Cal State Northridge, 6-3.

Pete Lambert, brother of Dan was instrumental in the sweep by the Mustangs winning Saturday's match against Marshall Manson of Northridge, 6-2, 2-6, 6-1.

Jorgensen's squad now stands 11-4 overall for the season (4-0 in conference play) and resumes non-league action this weekend in Coleta. It will be a four team tournament involving the Mustangs, Long Beach State, Fresno State and Santa Barbara.

The netmen's next match is home on April 25th against the Broncos of Santa Clara.

THE NAVY

The Nuclear Age is here, but finding qualified men to master its advanced technology isn't easy. The Navy needs these men because it operates 70 percent of all U.S. nuclear power plants. As a junior or senior in engineering, math, physics, or chemistry, you may be eligible to apply for a \$6000/month scholarship during your senior year with guaranteed nuclear training upon graduation-as part of the world's most experienced nuclear employer, the U.S. Navy.

Aviation oriented sophomores or juniors can reserve a place for themselves in Naval Aviation right now. As an undergraduate in the Aviation Reserve Officer Program (AVROC), you're guaranteed flight training upon graduation and you accumulate pay longevity while in school.

The Navy Officer Information team will be in the Student Cafeteria and Placement Center from 10 a.m. to 2 p.m.
